

See what Principals and Teachers have to say about the BEE CLEVER Series

"I am delighted to see these BEE CLEVER workbooks that do not pitchfork the child straight into the three R's but are systematically going through all the requisite stages of reading, writing and math readiness. They are enjoyable and creatively made with attention to details. Introductions are useful and informative and instruction lines are crisp and easy to follow. This is what children have needed all along and not had access to!"

Nandita Jhaveri

Former Vice Principal, New Era School
Consultant in Early Childhood Care and Education

"I have gone through the entire set of BEE CLEVER workbooks and find them very clear and simple to follow by little children in school. They have been aptly designed for pre-schoolers. The activities are age-appropriate and all the concepts are dealt with systematically and clearly. The illustrations are clear and the pages not too cluttered with activities."

Lekha Merchant

Head Teacher, Saifee Eidiz Zahabi Nursery & K. G. School

"Based on decades of experience by Pallavi Dalal, a knowledgeable and sensitive teacher, these books are aimed at helping children consolidate their concepts based on practical experiences."

Nalini Chhugani

Secretary, Mobile Creches
President, Association for Early Childhood Education and Development
(Mumbai Branch – AECED)

"The BEE CLEVER workbooks are attractive, pictures are large, clear and appropriate. Instructions are precise and brief. There is an element of surprise to sustain the interest of the child. The contents match with the themes generally used in pre-school. The illustrations have a sense of humour and fun."

Jana Mahadevan

Former Head of Department, Early Childhood Education (ECE)
Nirmala Niketan and Sophia Polytechnic

"BEE CLEVER Series is an excellent collection of child-friendly, challenging books that help develop visual discrimination skills that help them to think and reason efficiently. Each page has been meticulously planned and a theme has been chosen so that a teacher can creatively weave a story around it. Clear, simple instructions help the children to persevere until they successfully achieve the challenge that is placed before them."

Zeenat Bhojabhoy

Principal, Jamnabai Narsee School

Join The Dots

Book 2

'Join The Dots' is an activity that offers great stimulation to children!

In addition to building fine motor skills, 'Join the Dots' as an activity can be of great value to a child:

- Encourages the child to 'count' in the correct sequence
- Improves eye-hand co-ordination
- Motivates the child to 'complete' the task and see the result
- Enables the child to make simple controlled movements with the crayon
- Contributes greatly to the further development of 'writing readiness'
- Provides an element of 'surprise' which all children love!

Before actually starting to join the dots, it would help the child to LOOK at the dots (and numbers) properly and 'join' them with his/her finger first while saying the numbers out loud. This will contribute significantly to 'succeeding' and making the child feel a sense of achievement.

Mistakes can happen but remember that all children do not progress at the same pace and do accept individual differences.

Attention: Teachers and Parents

Join the dots to see the biggest animal in the jungle.

Join the dots to see something that gives us light when it is dark.

Join the dots to make something that keeps you dry when it is raining.
