# Introduction

Although this book is titled *The Seven Spiritual Laws of Success*, it could also be called *The Seven Spiritual Laws of Life*, because these are the same principles that nature uses to create everything in material existence — everything we can see, hear, smell, taste, or touch.

In my book, Creating Affluence: Wealth Consciousness in the Field of All Possibilities, I have outlined the steps to wealth consciousness based on a true understanding of the workings of nature. The Seven Spiritual Laws of Success form the essence of this teaching. When this knowledge is incorporated in your consciousness, it will give you the ability to create unlimited wealth with effortless ease, and to experience success in every endeavor.

#### INTRODUCTION

Success in life could be defined as the continued expansion of happiness and the progressive realization of worthy goals. Success is the ability to fulfill your desires with effortless ease. And yet success, including the creation of wealth, has always been considered to be a process that requires hard work, and it is often considered to be at the expense of others. We need a more spiritual approach to success and to affluence, which is the abundant flow of all good things to you. With the knowledge and practice of spiritual law, we put ourselves in harmony with nature and create with carefreeness, joy, and love.

There are many aspects to success; material wealth is only one component. Moreover, success is a journey, not a destination. Material abundance, in all its expressions, happens to be one of those things that makes the journey more enjoyable. But success also includes good health, energy and enthusiasm for life, fulfilling relationships, creative freedom, emotional and psychological stability, a sense of well-being, and peace of mind.

#### Introduction

Even with the experience of all these things, we will remain unfulfilled unless we nurture the seeds of divinity inside us. In reality, we are divinity in disguise, and the gods and goddesses in embryo that are contained within us seek to be fully materialized. True success is therefore the experience of the miraculous. It is the unfolding of the divinity within us. It is the perception of divinity wherever we go, in whatever we perceive — in the eyes of a child, in the beauty of a flower, in the flight of a bird. When we begin to experience our life as the miraculous expression of divinity — not occasionally, but all the time — then we will know the true meaning of success.

Before defining *The Seven Spiritual Laws*, let us understand the concept of law. Law is the process by which the unmanifest becomes the manifest; it's the process by which the observer becomes the observed; it's the process by which the seer becomes the

scenery; it's the process through which the dreamer manifests the dream.

All of creation, everything that exists in the physical world, is the result of the unmanifest transforming itself into the manifest. Everything that we behold comes from the unknown. Our physical body, the physical universe — anything and everything that we can perceive through our senses — is the transformation of the unmanifest, unknown, and invisible into the manifest, known, and visible.

The physical universe is nothing other than the Self curving back within Itself to experience Itself as spirit, mind, and physical matter. In other words, all processes of creation are processes through which the Self or divinity expresses Itself. Consciousness in motion expresses itself as the objects of the universe in the eternal dance of life.

The source of all creation is divinity (or the spirit); the process of creation is divinity in motion (or the mind); and the object of creation is the physical universe (which includes the physical body).

### INTRODUCTION

These three components of reality — spirit, mind, and body, or observer, the process of observing, and the observed — are essentially the same thing. They all come from the same place: the field of pure potentiality which is purely unmanifest.

The physical laws of the universe are actually this whole process of divinity in motion, or consciousness in motion. When we understand these laws and apply them in our lives, anything we want can be created, because the same laws that nature uses to create a forest, or a galaxy, or a star, or a human body can also bring about the fulfillment of our deepest desires.

Now let's go over *The Seven Spiritual Laws of Success* and see how we can apply them in our lives.
